## REACH CLEAN Wall-hung toilet with rimless bowl.

# Germs have nowhere to hide!

Why put a check on cleanliness when design and technology can offer the best?

Kohler has launched Reach with the REACH CLEAN technology for ultimate hygiene.

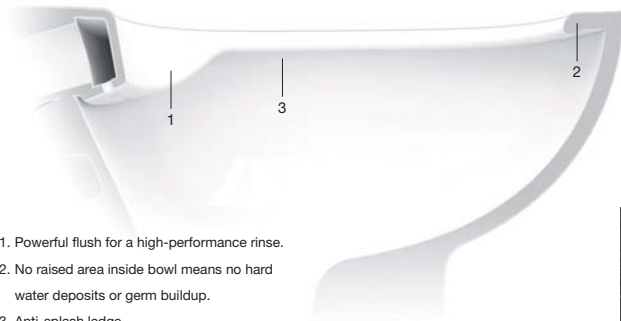

### The «stroke of the pencil» that changes everything.

Our engineers and creatives redesigned your future toilet bowls by eliminating the rim and enhancing rear water propulsion.

The rim is the lip around the toilet that delivers water for rinsing the bowl interior.

But it is also the place where all kinds of germs hide.

#### REACH CLEAN

1. Powerful flush for a high-performance rinse.
2. No raised area inside bowl means no hard water deposits or germ buildup.
3. Anti-splash ledge.

WC with rim

### A design with proven efficiency.

When you take away the toilet rim, you also eliminate inaccessible nooks and crannies that are not very sanitary.

Hard water deposits, grime and all kinds of germs can collect underneath.

The bowl design and a more powerful flush provide maximum hygiene.

### Easy care: immaculate in 5 seconds.

By removing the rim and fitting REACH CLEAN with an easy-to-remove seat, Kohler does away with toilet chores and makes cleaning a snap. A wipe with a sponge is enough!
